

American Coed Pageants – National Pageant Stage Layout

*The girls will enter from the center of the stage and walk to their right towards star number 1 and pause on it once they get there. There will be actual Xs on the stage not stars. From star 1 they will move to star 2. Once at star 2 the girl will do a circle turn if she is a princess or a circle turn and a pivot turn if she is older than a princess. The girls can actually do whatever they are comfortable with once they are on star 2, the previous instructions about the turns are just suggestions. After the girl has done her turns, she will move to star number 3. She will pause again on star number 3 and then proceed off of stage left. Escorts are NOT used during the eveningwear competition at the national pageant.

***NOTE:** this is the exact set up for the grand ballroom but in the international ballroom the emcee will be on stage LEFT
